

# Apollo Solar – Application Notes for the T80 TurboCharger™

## APP NOTE 004: Using the Apollo Solar Network with the Wired Remote Display

The RD-WIRED remote display comes with an ASNET network option card as the means of connecting it to the T80.

### NETWORK OPTION CARD

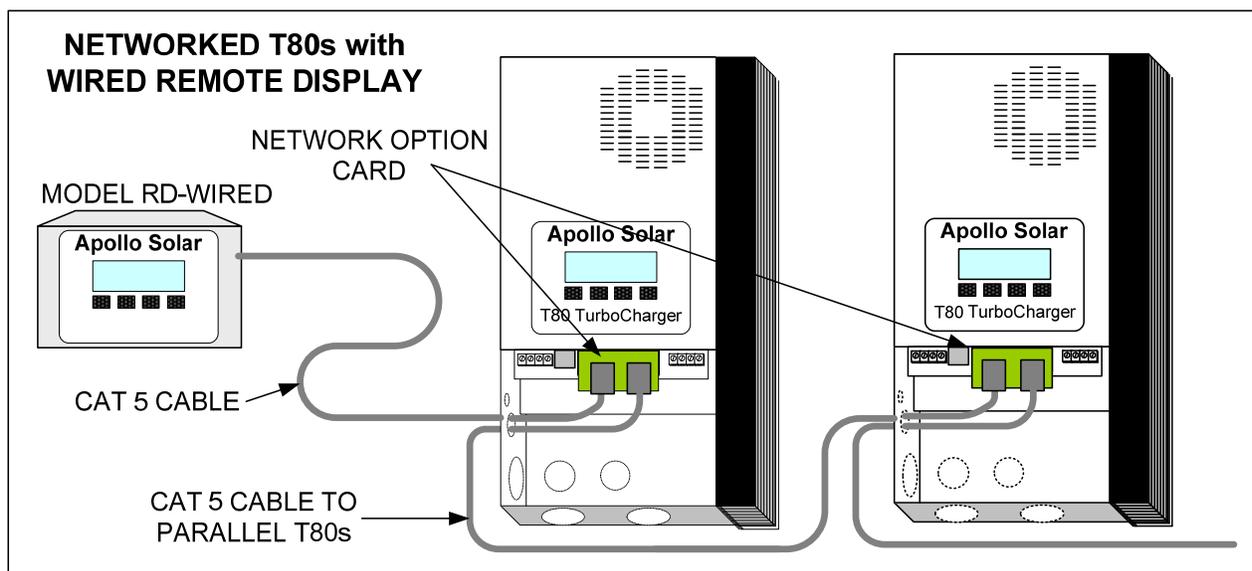

Each ASNET card contains 2 RJ-45 modular jacks for common 8 wire CAT5 cable.

**CAUTION:** These ASNET is NOT an Ethernet compatible system and RJ-45 connectors must NOT be connected to a computer or any Ethernet device.

Up to 15 additional T80s may be added in parallel by plugging into the RJ-45 Jack on the existing Network Option Card.

The ASNET option includes one Network Option Card and one CAT5 cable. One Network Option Card is required for each T80 in the system. See User Manual for detailed setup instructions.
